E PROBLEMANAN DI VELOCIDAD

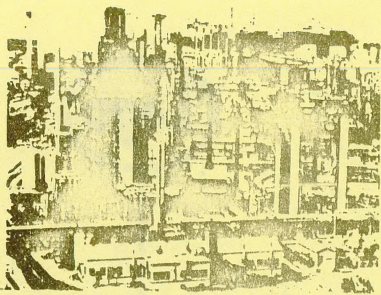

Considera e riesgonan involvi ora cu bo stuur cu demasiado velocidad:

- Si tin un situacion di emergencia imprevisto lo bo tin menos tempo pa pensa y actua pa preveni un accidente.
- Mas lihé bo corre, mas distancia bo mester pa bo por stop.
- Cu un velocidad mas halto bo tin mas limitacion ariba bo habilidad pa tira bista pa dilanti y na cada banda. Asina ta, un situacion cu por resulta den un accidente por desaroya promer cu bo ta na altura di dje.
- Un accidente na alta velocidad por ser hopi mas serio cu un accidente similar na velocidad reduci.

THE PROBLEMS OF SPEED

Consider the risks involved when you drive too fast:

- If there is a sudden emergency situation you will have less time to think and act to prevent an accident.
- The faster you go, the greater distance you will need in which to come to a stop.
- At higher speed, greater limitations are placed on your ability to scan and see ahead and to the sides. Thus, an accident producing situation could develop before you are aware of it.
- An accident at high speed is much more likely to be serious than a similar accident at a lower speed.

DRIVE SAFELY AND LIVE!
HAPPY EASTER!
